

Building & Landscape Services Website Text

HOME PAGE

Building and Landscape Services is a Kent based company specialising in all garden landscaping, from patios, driveways and paving to fencing and garden clearance, as well as external and internal building and specialist brickwork, including fireplaces.

Building and Landscape Services and Building and Technical Services are two halves of one company, run by father and son, Keith and Chris Rawlinson.

Keith Rawlinson is a builder with 20 years experience in all aspects of building work. Having completed his training in London, he moved to Kent and set up his own business. He updated his original City & Guild qualifications and obtained current NVQ qualifications to L3. He has also completed a Lime Mortar Putty Mix Conservation Scheme in Canterbury and took a major part in the reconstruction of one of the walls at Kingston Church.

Chris Rawlinson, his eldest son, spent his early youth learning the trade assisting Keith before obtaining his qualifications at Hadlow College and taking over the landscaping side of the business. Having worked for two years installing solid fuel fireplaces, Chris qualified as an independent HETAS Registered Engineer. As well as providing landscaping services, Chris is experienced in the installation of solid fuel fireplaces and log burning stoves as well as chimney liners and factory made flue systems.

LANDSCAPING SERVICES

Building and Landscape Services provides a comprehensive landscaping service throughout Kent, from garden planning, patios and driveways to decking and fencing.

Transform your garden with a patio or decking. Examples of our work can be seen at The Railway Station Farm Shop in Wingham, where we have constructed separate patio and decking areas.

We also construct summerhouses, sheds, arbours and pergolas, and can even move existing constructions to a different area.

Garden clearance can also be arranged – call us today for a free quote.

A new driveway can be messy work, but we will always leave the place clean and tidy at the end of our working day.

Customer satisfaction matters a great deal to us. Please read the testimonials from our clients. If you are happy, we are happy!

Please contact Building and Landscape Services on 07738 228 543 for a free quotation.

We carry full liability insurance.

SPECIALIST BRICKWORK AND BUILDING SERVICES

Specialising in all aspects of brickwork, building and technical services, from planning to construction, Building and Technical Services is part of Building and Landscape Services.

Keith Rawlinson of Building and Technical Services specialises in planning applications, specifications and schedules, guiding and advising you through this sometimes lengthy and complex process. We always work to full drawn plans, which we provide for you.

From groundwork to roofing and the majority of work in between, Building and Technical Services is highly experienced in the restoration and conservation of brickwork and the use of lime mortar mix.

Examples of our work can be seen at Kingston Church, where we were actively involved in the reconstruction of one of the church walls.

Please contact Keith Rawlinson of Building and Technical Service on 01227 830 789 or 07743 692 159

FIREPLACE SERVICES

Building and Landscape Services supplies and installs solid fuel fireplaces, log burning stoves, chimney liners and factory made flue systems.

Chris Rawlinson of Building and Landscape Services is an independent HETAS Registered Engineer. Hetas is a regulatory body for the installation of solid fuel fireplaces. Once a solid fuel fireplace has been installed a certificate of compliance will be issued to show that it has been correctly installed, conforming to the legal requirements and regulations.

Building and Landscape Services also restores Inglenook fireplaces. For examples of our work, please view our gallery.

Building and Landscape Services carries full liability insurance.
