

Trans 4 Mations Fitted Bedrooms

Imagine walking into your bedroom and seeing no clutter, no mess. A place for everything and everything in its place.

This doesn't have to be a dream - Trans 4 Mations can make it a reality and for a lot less than you might think.

Trans 4 Mations specialises in creating luxurious fitted bedroom furniture that makes the most out of your room including those really awkward spaces.

Our fitted bedroom design consultants will transform your thoughts into reality with easy to read floor plans and beautiful hand drawn elevation drawings, showing you how your bedroom could look.

We can make any piece of bedroom furniture to any size, and with over 50 different styles in as many finishes to choose from, we guarantee it will be truly unique to you.

From bedside cabinets and dressing tables to tall boys, chests of drawers and fully lined wardrobes, all our furniture is designed, and made by qualified, professional carpenters and craftsmen and installed by our own team of professional fitters.

Your bedroom should be a peaceful, calm and harmonious space where you can relax in comfort. Such a place cannot be created when you are constantly being asked to make a sales decision. That's why with Trans 4 Mations the only decisions you will be asked to make during a design visit will be design related.

With one phone call you can arrange for a bedroom design consultant to come and survey your room, and get you started on the path to tranquillity.

Following your design visit you will be sent an itemised quotation with each price option broken down, allowing you to make your own choices in the comfort of your own home with no salesperson present.

Once you've made your choices and paid a deposit we will start making your new furniture – Your ideal bedroom is then only 4 weeks away from becoming a reality.
